

PROMOTING RESEARCH ENGAGEMENT THROUGH JOURNAL CLUB (JC)

AUTHORS: P.Bekoe, F.Cox, E.

Gerlando

INTRODUCTION

First randomized controlled trial conducted regarding the impact of JC in 1988 reported 86% of reading habits improved, enhanced knowledge and critical appraisal skills were recorded (1,3).

JC in ICU promotes Evidence-based practice (2,4).

FUTURE PLANS

We plan to run the HH JC for a year and undertake a post evaluation to assess its impacts.

AIM

To promote research in nursing engagement through JC @HH ITU

IMPLEMENTATION

With support from management, HH ITU currently have an active nursing JC, held monthly, with attendances from ITU nurses across NHS, appraising and discussing critical care journal articles.

METHOD

To enhance participation and management support, a survey was conducted among potential audience to encourage participation and support.

RESULTS AND DISCUSSION

'Excellent idea'

'I think it will help reflect, support and learn with each other'

Based on the survey report and suggestions, a project overview was presented to management for support.
